Phone: 856-906-4876

---

Education:	<b>Computer Science Major</b> / Imaging Science Minor 2008 – 2012	Rochester Institute of Technology GPA: 3.5
------------	--	---

---

**Relevant Coursework:** Digital Image Processing I/II, Bio Inspired Intelligent Systems

---

Languages and Tools:	<b>Experienced With:</b> C, Ruby, Java, Python, git <b>Familiar With:</b> SQL, Javascript, Matlab, C++
-------------------------	---

---

Experience:	<b>Transportation Engineer</b> January 2014 – Present	Amazon Seattle, WA
-------------	--	-----------------------

- Integrated with a system to allow carriers to use geocoded polygons to define shipping areas and shipping times to deliver to those areas

---

<b>Software Development Engineer</b> August 2012 – November 2013	Microsoft, Windows Phone Redmond, WA
---	---

- Delivered a compelling prototype bringing a new touch digitizer technology into our existing touch framework
- Worked with C++ and C to modify and refactor our legacy touch stack to work with new touch hardware

---

<b>Malware Development Intern</b> June 2011 – August 2011	Booz Allen Hamilton Linthicum, MD
--	--------------------------------------

- Developed a comprehensive malware application for the Android platform
- Used Java and C to circumvent Android security measures
- Became familiar with the reverse engineering of both x86 and Android malware through IDA and smali

---

Projects	<b>Bandcamp Radio</b> <ul style="list-style-type: none"><li>• Created a web application based off of Ruby, Javascript and Websockets to play music from Bandcamp tagged with certain genres</li></ul>
----------	---

---

## **Where Should I Live?**

- Parsed online sources to create database of bus frequencies, restaurant quality, and apartment cost in Seattle
- Used data to create a heatmap of desirable locations depending on user preferences

---

## **Jame Gam**

- Created a tone-based exploration game in HTML5 and Javascript for a 24-hour game jam

---

## **Finding walking trails in Satellite Images**

- Developed a program in Matlab based on seam carving which detected walking trails in a forested area from LIDAR and multi-spectral image data
